

GLOBAL LOGISTICS AT YOUR DOOR

BLG is a proven world leader in Automotive Logistics.

BLG manages parts and materials inventory for just-in-sequence (JIS), just-in-time (JIT) supply to production, and transportation for the world's leading automotive brands.

In the Southeast we operate a 1 million sq ft logistics center for one of the largest German automotive manufacturers (OEM), from secure container yard management to optimized sequencing and line-side delivery to manufacturing and returnable container management (RCM).

BLG also manages additional facilities for kitting, pick and

pack, parts assembly, subassembly and Semi Knock Down (SKD) services to support that operation.

In Europe BLG manages more than 25 million sq ft in similar operations, extending to delivery of millions of finished vehicles internationally to dealerships, on time and in perfect condition.

### For BMW – Optimal Efficiency at Scale

**Warehouse capacity:** 2.5 million sq ft

A total annual volume of up to 6 million parts are packed and loaded on-site.

**Range of Services:** BLG handles incoming goods via truck, performs quality inspections, packages materials, repacks auto parts from reusable containers in up to 1,500 loading units per day, manages inventory and containerizes deliveries for outbound transportation.

The BLG team on-site ships over 150 different part families to 4 different continents.

In the US, Just-In-Time (JIT) is impressive in most industries but inadequate for automotive OEM's. BLG manages complex Just-In-Sequence (JIS) deliveries of more than 8,000 assembled, tested, inspected and custom-ordered auto parts for production of one of the world's most respected brands. This leading German OEM, turns more than 900 vehicles per day from the production line.

Team BLG has mastered reliable inbound logistics to manufacturing and takes pride in adding value to the world's leading automotive supply chains.

If you're an OEM, you need to keep production running. Smoothly. Efficiently. Constantly. If you're an OEM, that smooth, constant efficiency means cost avoidance. If you supply an OEM it means revenue, growth and good times.

### Obsession with Quality & Precision

Our German heritage combines with more than a decade of US operation for an unbeatable combination for the Automotive Industry: German Engineering & American Innovation. BLG is obsessed with quality and precision and driven to continually improve.

### Talent for the Future

Sustainability means investments in Technology, 'Green Logistics' and Talent. BLG Academy is proof of our commitment, with certified graduates every year in partnership with local schools to attract, retain and develop the workforce of the future.
